

GR2

THE ALL-ROUNDER FAMILY
THE C2 SIMPLY CAN

No matter what – From centric to high-precision clamping systems and this in a diversity that you have never seen before – that’s our product family C2. With the C2 you will always find the right clamping device for your task, thanks to our modular system. GUARANTEED!

No Limits

The machining variety with C2 knows no limits. The C2 programme is the most versatile on the market. Centric, floating, with fixed jaws or as a double vice.

Nothing goes wrong.

The C2 vices offer a large process reliability and are dependable. You can rely on them.

Hardly any maintenance

The encapsulated spindle is protected from contamination. This allows the C2 to be cleaned in seconds without tediously scraping out chips.

Holds what needs to be hold

Grip for all materials. From plastic to aluminium to hardened materials (up to 58 HRC). Simply holds everything.

OP 10 and OP 20

Compact power package. Both processing steps with the C2 programme (C2 & SC2). Simple and efficient.

Range of jaws and own jaws

C2 offers a wide range of jaws but also the possibility to work with your own jaws. Pure flexibility.

Perfect for automation

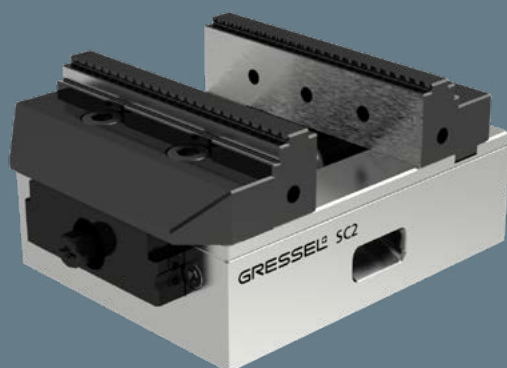

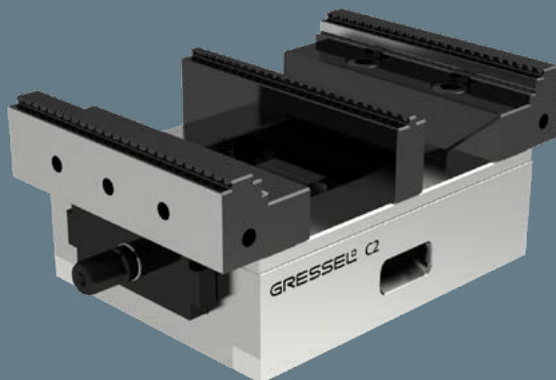

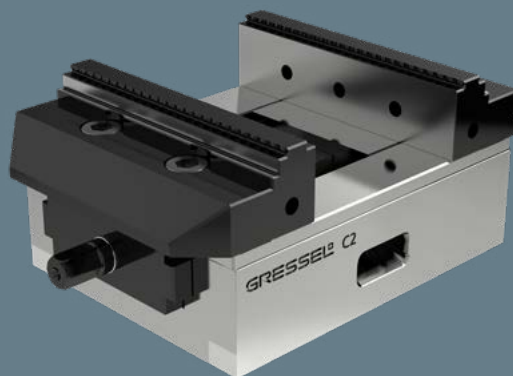

The C2 was created for automation. No one can do it better.

view product video:
